## Academy Application

**Student:** \_\_\_\_\_

The goal of the Academy is to provide a smaller environment for students in order to get to know them better, identify their unique needs, and personalize their learning experience. We do this through shorter classes, a consistent team of teachers from year to year (students will have the same ELA, math, science, and social studies teachers in grades 9-12), and maximizing our in-class time (no homework, graded or ungraded). This consistent team approach strengthens the relationships between students, staff, and their families. The Academy also benefits from access to its own full-time social worker, who can work proactively with students both in small groups and individually to build the skills they need to be successful in high school and beyond. Most of our classes are all in the same area of the building for proximity and wrap around support.
